From the Executive Director

We, the ones who are challenged, need to be heard. To be seen not as a disability, but as a person who has and will continue to bloom. To be seen not only as a handicap, but as a well intact human being.”

Robert M. Hensel

This is what Deepshikha has been all about. Bringing dignity into the lives of persons with intellectual disabilities....believing in them... their ability and not disability.

TheData Entry Unit has helped to bring an immense change in the perception, especially of their families, neighbourhood and the communities. These children have had a turnaround in how they are looked upon by their peers and in their behaviours.

Some new jobs have also helped to keep the youth busy and the bubble sheets keep them happy!

In the last few years building capacities of the educators have been given priority. The Training of Teachers (TOT) has been a regular feature throughout the year. Educators share their learnings if they have attended seminars/ workshops elsewhere. New articles, laws and other developments in the field also are discussed from time to time. The monthly meetings help us to discuss challenges and rejoice in successes.

The project with UNICEF brought us face to face with realities giving us the chance to understand the need of malnutrition children and their families vis a vis developmental disabilities; to think of strategies to work at grassroot level; to extend early intervention services to children with malnutrition so that it does not translate into disability.

Enable India, Bengaluru, have shown interest in working with Deepshikha, for persons with intellectual disabilities. We hope to and look forward to see its outcome in the coming months.

“THE GATHERED LEAVES” staged by the Ruchika Theatre Group was an experience not to be forgotten in a long time. For the audience of Ranchi, who do not get a chance to witness such performances often, it was a treat. Deepshikha will remain indebted to The Ruchika Theatre Group for staging this show without charging a penny. We would like to thank Dr. Radhika Alkazi and Feisal Alkazi for their generosity. The message that the play sent forth could not have been done better.

We thank all the sponsors, Purshree, and all members who helped to make it possible.

With three decades of work behind us, now we look forward to stepping into the next decade with a commitment to work harder, build a better and inclusive world and make Deepshikha a happier and meaningful place for our children!

Majority of children coming to Deepshikha outdoor clinic have diagnosis of mental retardation, followed by Developmental Delay. The trend noticed here is decline in cerebral palsy cases and a steep rise in children with autism. Deepshikha caters to children with speech and learning difficulties too.

Success Story

Satyam is a 5 year old full term child with a birth weight of 3.5 kgs. He had passed meconium and was aspirated because of which the child experienced a delayed birth cry. However, when he cried his cry was inconsolable. The hospital discharge report suggested perinatal asphyxia with excessive cry and recurrent seizure and apnea. He was also kept in ventilator.

When Satyam came to Deepshikha with delayed milestones, regular intervention was absolutely necessary for his holistic development. But his parents did not come for two years which greatly hampered the progress. His physical activities got compromised and led to severe behavioral disorders. After intensive therapies he has progressed mentally and physically.

Awards and Honours

8th March, 2019 — Mrs. Uma Sen Gupta, Director, Clinical services was honoured by 'Purshree' for her selfless service.

28th October, 2018 — Mrs. Mira Budhia, Founder of Deepshikha was honoured by Arya Samaj Mandir.

Early Intervention

Total No of Cases : 92

Total No. of Sessions : 322

This program is the core program of Deepshikha which has successfully catered to more than 5000 children. The content of the program is designed in a way which brings about holistic change in the individual regardless of the diagnosis.

- Services in this program include physiotherapy, occupational therapy, speech therapy, behavior modification and self-help skills done simultaneously four days a week. This is a group therapy program with a mixed group with children at different functional levels but more or less the same age level.
- Based on this pattern and the research done on teaching-learning material required we have developed an early-intervention kit also which is provided to every parent so that follow up is better at home.
- The success of the program is spelt out when we were assigned to train Rashtriya Baal Suraksha Karyakram (RBSK) doctors on our model of early intervention. Our team also visited 5 Malnutrition treatment centers repeatedly and trained the mothers to handle malnourished children so that the component of disability could be eliminated.

Success Story

Ambar Pankaj Bara is a 7 year old full term, normal delivery child who was born at home. The child experienced a delayed birth cry. After two days, the child suffered from jaundice and was in the incubator for 15 days. Again, after a year the child struggled from epileptic seizures. When he came to Deepshikha, he had the following problems:

1. Unable to sit and stand
2. Unable to hold neck
3. Unable to speak
4. Severe Athetosis

After regular intervention, the child has improved considerably. The child can now hold his neck at will, has started speaking certain sounds, and his sitting and standing has improved significantly.
